SUBJECT INDEX VOLUME 71

Abbreviated Injury Scale (AIS)
prediction of mortality, TBI patients, 1172
underestimated mortality, penetrating trauma patients, S384
2005 version, HAMP mapping algorithm, 85
2008 version
effect on quality assessment, 56
modified table to map 1998 scale, 1829
Abdominal closure, temporary, effects of different materials after open abdomen, 961
Abdominal pressure, pelvic volume change effects, injured pelvic ring, 585
Abdominal trauma
blast injury, hemoconcentration after, 694
blunt, microscopic hematuria as marker, 687
blunt splenic injury, nonoperative management, adult, 898
combat related, infection prevention, S270
hemorrhagic shock caused by, endovascular aortic occlusion, 720
indirect colonic wounding, military, 1475
open
concomitant enteroatmospheric fistula, 760
EAST review of management, 502
effects of temporary closure materials, 961
enteric injury management, letter, 1480
sepsis and ACS, liver function, 1319
postoperative infections, bacterial translocation in, 1258
stab wounds, WTA algorithm for management, 1494
N-Acetylcystiene, tourniquets in the battlefield and, letter, 264
Acidosis, systemic, coagulation changes to, trauma patients, 1271
Acromioclavicular dislocation, acute, coracoclavicular cortical lag screw, E50
Acute care surgery
colorectal emergencies and, 94
impact on departmental productivity, 1027
nontrauma emergency, 1422
open abdomen, concomitant enteroatmospheric fistula, 760
regionalization of, effects on mortality, 442
training emergency physicians in, 43
trauma reimbursement, in private practice environment, 347
Acute Physiology and Chronic Health Evaluation II (APACHE II), long-term comparison, 1835
Acute respiratory distress syndrome (ARDS)
extracorporeal lung support, aeromedical evacuation, S91
gender differences, critically injured adults, 878
high-frequency oscillatory ventilation, multiple organ failure and, 1536
Adenosine, with sodium chloride magnesium, resuscitation after hemorrhagic shock, 708
Adhesions, after exploratory laparotomy, in-hospital small bowel obstruction, 486
Adolescents, juvenile driving intervention program, trauma center-based, 223
Advanced practitioners (APs), ICU, simulation training for, 330
Advanced Surgical Skills for Exposure in Trauma (ASSET) course, Canada, 1491
Advanced trauma life support, trauma protocols and, letter, 1097
Aeromobile modular suites, critical care, resuscitation, and surgical, for operational medicine, S494
Afghanistan
Canadian force members, causes of death, S401
Canadian-led role 3 multinational medical unit, Kandahar, Afghanistan, S397
combat casualties
extremity injuries, infection prevention, S235
infectious complications, S62
multidrug-resistant colonization, S62
French ICU, freeze-dried plasma use in, 1761
predeployment trauma team, post-Afghanistan validation study, S487
Africa, major burn disaster, response to, 573
Aging
head injury, factors in mortality, E8
mortality inflection point, cervical spinal cord injury, 380
Agmatine, traumatic brain injury, gliosis-reduced, E87
Air transport
Royal Flying Doctor Service, Western Australia, 1816
severe lung injury, care in the air capability gap, S91
Airway management, cricothyrotomy devices, spontaneous and controlled, model lung, 886
Airway pressure release ventilation (APRV), physiologically relevant application, letter, 262
Alcohol
complications after work place injuries and, National Trauma Data Bank analysis, 1035
under the influence, child safety and, MVC outcomes, S522
use by pedestrians, motor vehicle accidents and, 1252
Alpine skiing, mandatory helmet use, Austrian ski slopes, 1085
Aluminum silicates, in hemostatic dressings, toxicity of, 727
Amputation
calcaneal blast fractures, IEDs, 1694
infectious complications, soft tissue injury and, S47
lower extremity, racial odds for, 1732
lower limb, prehospital hemorrhage, tourniquet use, 591
thumb replantation, Quick DASH and modified Mayo score, 460
Analgesia, burn debridement, virtual reality pain control, S125
Anaphylatoxin receptor C5aR, expression, bone fracture healing, 952
Anemia
association with TBI, letter, 784
of critical illness, in burn patients, 26
mortality correlation, severe TBI in emergency department, E132
Angiogenesis, sNAG nanofibers, ADP-inhibitor-treated diabetic mice, S183
Angiography
blunt splenic injury, nonoperative management, adult, 898
hemorrhage, in pelvic fracture, 1850
Angiopoietin-1, excessive levels, platelet activation and, in TBI, letter, 1480
Ankle-foot orthosis, rehabilitation and, after limb salvage, S120
Anticoagulants, role in delayed intracranial hemorrhage, after blunt trauma, 1600
Anticoagulation
deep vein thrombosis, after spinal cord injury, 867
NAG effects on Factor VIIa, clot formation in hemophilia, S171
upper extremity deep vein thrombosis, natural history, 316
Antifactor Xa, low levels, enoxaparin and, in burn patients, 1557
Antifibrinolytic agents, bleeding in trauma patients, treatment protocols, S9
Antimicrobials
point-of-injury, combat casualties, S307
prescribing practices, infections in combat-related injuries, S298
Antiplatelet agents
mild TBI, risk of platelet transfusion, 358
role in delayed intracranial hemorrhage, after blunt trauma, 1600
Aortic balloon, occlusion
adjunct for hemorrhagic shock, 1869
survival in hemorrhagic shock and, 720
Aortic cross-clamp, *versus* direct vascular control, extrathoracic torso hemorrhage, 1278
Aortic injury, minimal, in blunt trauma, 1519
Aortic rupture, endovascular repair, compared with operative repair, 1059
Apoptosis, trauma-induced lung injury, intravenous sulfide effects, 1659
Appendicitis, suppurative, septic thrombophlebitis, image of trauma, E17
Aquaporin 5, deletion, aggravation of acute lung injury, 1305
Aquaporin 1 and 5, pulmonary injury, hyperbaric oxygen preconditioning effects, 673
Arterial base deficit, from first peripheral venous sample, trauma patients, 793
Arthritis, septic knee, arthroscopy and irrigation system for, 454
Arthroplasty
distal humerus fractures, elderly patients, 635
knee and hip, interprosthetic fractures of the femur, 1715
Arthroscopy
debridement, septic knee arthritis, 454
subtalar, in intra-articular calcaneal fractures, 917
Arthrotomy, elbow, saline load test in, E110
Ascorbic acid
in lyophilized plasma, for inflammation in hemorrhagic shock, 292
in lyophilized plasma, inflammation and DNA damage, 20
Atlanto-occipital dissociation, traumatic, survival in, 393

Autografts, free hamstring, repair of quadriceps tendon rupture, 1048
Avascular necrosis, proximal humerus fractures, retrograde intramedullary pinning, 238
Azygos vein, radiographic appearance, volume status in trauma patients, S468

Bacterial translocation, postoperative infections, abdominal trauma, 1258
Ballistic injuries, indirect fracture to bone, 1381
Base deficit
  first peripheral venous sample, trauma patients, 793
  maker of hypoperfusion, heart rate discrepancy, mortality and, 789
Bayesian networks, in prediction of outcome, ICU patients, 1841
Beltz score, long-term outcome, mild TBI, 120
Benchmarking
  functional outcome assessment measures, impact on trauma registries, 63
  impact of AIS 2008 version, quality assessment, 56
Bifrontal contusions, late deterioration and, in TBI patients, 1588
Bile leak, after liver trauma, ERCP as treatment for, 480
Biomarkers
  mild TBI, prediction of outcome, S478
  severe TBI, time course of recovery, 1235
Biomechanics
  behind armor blunt trauma, spinal injury, 1680
  stabilization system
    distal femur fractures, 620
    unstable femoral neck fractures, 625
Bisphosphonate, femur fractures related to, surgical treatment, 186
Blast exposure/injury
  controlled, mild TBI, S472
  deck-slap, pattern of injury, 1694
  indirect colonic wounding, military, 1475
  limbs, mangled extremity severity score, letter, 785
  microvascular dysfunction after, hemoconcentration caused by, 694
Bleeding volume, p38 MAPK mediation, renal dysfunction after hemorrhagic shock, 973
Blood-brain barrier
  cerebral contusion, early parenchymal contrast extravasation, 1593
  permeability, after TBI, dynamic contrast MRI, 1645
Blood pressure
  on admission, after blunt trauma, predictions, 1689
  use in prediction of mortality, traumatic brain injury, 1179
Blood storage, aged plasma, increased mortality and, 1115
Blood substitute, small-volume resuscitation with, hemorrhagic shock, 798
Bone marrow
  cells derived from, enhanced mobilization to site of injury, 283
  hematopoietic response, burn injury effects, 1288
Bone mineral density, proximal femora, elderly patients with hip fractures, 1720
Bone regeneration, sNAG fiber role in, femur injury, rabbit model, S194
Book reviews
  Excerpts From Selected Surgical Medical Readings (1832-1999), 1907
  Front Line Surgery: A Practical Approach, 258
Bowel injury
  gunshot pelvic fractures, debridement necessity, 577
  transmural, mesenteric hemorrhage and, multiphasic CT, 543
Brachial plexitis, posttraumatic, image of trauma, E136

Trauma audit filters, pediatric, adherence, mountain state, 1016
Trauma centers
development of trauma system, Tuscany, Italy, 1442
disparities of access, older motor vehicle crash occupants, 742
juvenile driving intervention program, long-term evaluation, 223
level I
ACS performance improvement and patient safety program, 1447
fractures in children and adolescents, Austria, E19
hospital resources due to complications, E102
variation in outcome, trauma patients, S389
proxy injury location, use of home, regionalized trauma system planning, 1428
quality improvement, urgent splenectomy, variations in, 1333
survival advantage in, elderly patients, 69
Trauma patients
admission platelet count effects, mortality and, S337
azygos vein, radiographic appearance, S468
bleeding, tranexamic acid use in, S9
blunt, clinical examination of cervical spine, 528
cardiac arrest, induced hypothermia after, 1524
catheter-related urinary tract infections, mortality, 1569
cirrhosis in, mortality prediction, 6
critically ill
dexmedetomidine evaluation, 1164
duration of platelet storage, 1766
defining transfusion practices, S315
severe brain injury and, S343
extubation failure, risk factors with early reintubation, 37
heart rate discrepancy, makers of hypoperfusion, mortality and, 789
hemodynamically stable, incidental findings with sonography, E123
high-risk, brief violence interventions in hospitals, 228
interhospital transfer, outcomes, 1885
long-term cognitive impairment, ICU survivors without intracranial hemorrhage, 860
nonmassively transfused, ratio effects on mortality, S329
pelvic radiography, cost-saving algorithm, 582
propofol sedation, bispectral index to monitor, 1415
safety of rFVIIa, CONTROL trial, 12
simulation, telemedicine in a moving ambulance, 49
venous thromboembolism, inferior vena cava filter placement, 323
Trauma protocols, *versus* advanced trauma life support recommendations, letter, 1097
Trauma registries
combat casualties, infectious complications, Afghanistan and Iraq, S62
functional outcome assessment measures, responsiveness of, 63
HAMP mapping algorithm, conversion of AIS 2005 to AIS 98, 85
JTTR, prehospital medical documentation, S103
Trauma scan, missed injuries, letter, 518
Trauma score, prehospital, value in prediction of mortality, 754
Trauma surgeons
Advanced Surgical Skills for Exposure in Trauma (ASSET) course, Canada, 1491
analysis, 1130
novel training model, 1484
reimbursement, in private practice environment, 347
Trauma surgery
analysis of trauma surgeons, 1130
hepatic, adults, 1
mRDH bandage
comparative review, S162
effective hemostasis, S167
surgeon's clinical judgment, *versus* imaging, letter, 266
training emergency physicians in, 43
Trauma systems
ACS performance improvement and patient safety program, 1447
annual hospital volume, in-hospital mortality relations, 339
pediatric, development in Tuscany, Italy, 1442
Traumatic brain injury (TBI)
anemia and, letter, 784
bifrontal contusions, late deterioration and, 1588
biomarkers, in children, 854
blood-brain barrier permeability after, dynamic contrast MRI, 1645
blood component use ratios, massively transfused patients, S343
brain natriuretic peptide role in, 820
cerebral vulnerability after, time course of recovery, 1235
coagulopathy after, children, 1205
CT-verified, intubation patterns and outcomes, 1615
decompressive craniectomy
cost-effectiveness, 1637
diffuse cerebral swelling, letter, 266
use in children, 133
decompressive craniectomy, nonabsorbable dural substitute use in, 533
decompressive craniectomy in, contralateral subdural effusion after, 833, 1090(letter)
discharge against medical advice, intentional injury as a predictor, 1219
dysautonomia after, risk factors related to, 538
epidural hematoma, epidemiology of, young age, 847
experimental, operation brain trauma therapy, S15
gliosis-reduced, E87
IMPACT outcome prediction score, mortality, 387
in-hospital death after, sepsis in, population-based study, 1226
lipid mediators, in cerebral spinal fluid, 1211
long term disorder of consciousness, systematic review, 1465
mild
abnormal neurologic exam with, repeat CT after, 1605
controlled blast exposure, S472
long-term outcome, 120
platelet transfusion in, 358
serum biomarkers in prediction of outcome, S478
subarachnoid hemorrhage and concussion differences, 1199
mortality
AIS and GCS prediction, 1172
modified GCS prediction, 1185
outcomes
gender effects, 1620
nontherapeutic hypothermia effects, 1627
plasma copeptin levels, mortality and, 1194
platelet activation, excessive angiopoietin-1 levels, letter, 1480
posttraumatic seizure, levetiracetam and phenytoin, 375
prehospital risk factors, effects on outcome, 826
premorbid statin use effects, older individuals, 815
presenting blood pressure, prediction of mortality and, 1179
PTSD and, letter, 1910
pulmonary dysfunction and, erythropoietin effects, 680
severe
anemia and mortality, emergency department, E132
immediate splenectomy after, 141
intracranial hypertension and cerebral hypoperfusion after, 364
skull bone fracture, effect on outcome, 1611
thromboembolic prophylaxis, timing and type, 396
Triage
disparities of trauma center access, older motor vehicle crash occupants, 742
protocol modifications, letter, 267
vehicular crashes, scene mobility status as predictor of injury, 737
Troponin, detection of heart tissue damage, after blunt chest trauma, 1134

© 2011 Lippincott Williams & Wilkins

Tumor necrosis factor-α, p38 MAPK mediation, renal dysfunction after hemorrhagic shock, 973

Ulinastatin, pulmonary function and, severe burn-induced lung injury, 1297
Ultrasonography
  blunt trauma, incidental findings, E123
  Doppler, deep vein thrombosis after spinal cord injury, 867
  low-intensity pulsed, in distraction osteogenesis, 1376
  ocular, for intracranial hypertension, 779
  resuscitative, remote low-cost telementored, 1528
Upper extremity, deep vein thrombosis, natural history, 316
Urban populations, HIV and hepatitis, penetrating trauma patients, 306
Urinary tract, catheter-related infections, mortality and, trauma patients, 1569

Vacuum-assisted closure (VAC)
  delayed flap reconstruction, open tibial fracture, 1705
  sNAG fibers and, healing in diabetic mice, S187
Validity, Burn Specific Health Scale–Brief, 78
Vascular injury
  elderly patients, National Trauma Databank review, 909
  noncompressible torso hemorrhage
    direct vascular control in, 1278
    management, porcine model, S131
Vascular thoracic injury, secondary to blunt chest trauma, children, 904
Vasopermeability, blast injury effects, hemoconcentration caused by, 694
Vasopressor, early use, in critical injury, 565
VATS. *see* Thoracoscopy
Vein occlusion, surgical, four different methods, rat model, E55
Vena cava. *see also* Inferior vena cava
  double, requiring filtration, image of trauma, 1909
Venous base deficit, from first peripheral venous sample, trauma patients, 793
Venous thromboembolism
  burn patients, enoxaparin dose adjustment and, 1557
  inferior vena cava filter placement, trauma patients, 323
  risk of, spinal cord injury, 1241
Ventilation
  airway pressure release, letter, 262
  high-frequency, severe lung injury, aeromedical evacuation, S91
  high-frequency oscillatory, in ARDS, multiple organ failure and, 1536
  mechanical (*see* Mechanical ventilation)
  percutaneous transtracheal jet, model lung, 886
  Ventriculostomy, placement, INR and hemorrhage development, letter, 262
Vertebral artery injury, blunt, prediction by modeling, 114
Video-assisted thoracoscopy (VATS). *see* Thoracoscopy
Violence, brief interventions, community case management, 228
Virtual reality, pain control, burn wound debridement, S125
Virulence transcription regulation, intestinal ischemia-reperfusion injury, *P. aeruginosa* and, 1575
Vital signs, injury severity and, wounded soldiers, S87
Volume assessment, azygos vein, radiographic appearance of, S468

Warming, external, heating pad, survival in hemorrhage and, 1902
Wartime injury. *see also* Combat casualty care
  Canadian-led role 3 multinational medical unit, Kandahar, Afghanistan, S397
  death of battlefield wounds, improvement in combat casualty care, S4
  drug-resistant chronic osteomyelitis, Iraqi civilians, 252
  life-saving interventions, out-of-hospital personnel, S109
Western Trauma Association, algorithm for management of blunt hepatic trauma, 1
Wound care
  burn debridement, virtual reality pain control, S125
  negative pressure therapy, silver dressings and, S147
Wounds and injuries
  battlefield
    exsanguination shock, S1
    improvement of combat casualty care, S4
    mRDH bandage for effective hemostasis, S167
  diabetic, sNAG nanofibers and angiogenesis, S183
  extremity fractures and amputations, pulmonary embolus, 607
  firearm, bromelain enzymatic debridement, 966
  healing, effects of temporary closure materials in open abdomen, 961
  indirect colonic, military, 1475
  musculoskeletal, Operation Iraqi Freedom, E1
  open, fluid lavage, 596
  penetrating cardiac, 3D TEE, image of trauma, 260
  proxy injury location, use of home, regionalized trauma system planning, 1428
  sNAG and vacuum-assisted closure, healing in diabetic mice, S187
  stab wounds
    anterior abdominal, WTA algorithm, 1494
    novel training for trauma surgeons, 1484
  tibia fracture, delayed flap reconstruction with VAC, 1705
  tranexamic acid, use in bleeding trauma patients, S9
